# Radio: *the most wonderful public communication system*

- “Radio could be the most wonderful public communication system imaginable, a gigantic system of channels - could be, that is, if it were capable not only of transmitting but of receiving, of making listeners hear but also speak, not of isolating them but connecting them”

(Bertolt Brecht 1930, a German theatre practitioner, playwright, and poet)

**Vision:** Students and Teachers view the school environment, through Web Radio, as one participative and innovative space for Self-Expression and Creativity...

...with a Network of Schools which becomes an Active Learning Community over a *common Radio Program*

The direct target :

- Students (primary and secondary education – from public and private schools) and
- Educators (teachers of primary and secondary schools)

*Graffiti (2010): Λελάκης Δημήτρης, former student*

European School Radio is the only Web Radio

- ✓ Operating **24/365 -Radio Program** for thousands radio producers,
- ✓ With ensured **Copyright and legal issues** for producers,
- ✓ With **Personal Data Protection**,
- ✓ Is under the Auspices of the **Ministry of Education** and
- ✓ Holds a repository of more than **3.500 thousand** recorded and live radio shows

It is a 'Learning Community' because it

- **inspires** various kind of learning and recreational activities around a web radio
- **promotes collaboration** especially between students and students and educators
- **makes schools come closer** among them but also with the local and wider community
- **develops of critical thinking and speech, democratic ideals**
- **provides students with personal development and also vocational prospects** around the use of media, radio professions, journalism, sound engineering and other.

The NESTOR project creates a Web Radio across Europe

- Promotes media literacy in education
- Creates a learning community
- Integrates modern educational requirements
- Caters for visual impaired students
- Provides the tools for media related skills, through participation of every European learner to a public radio program and the exchange and dissemination of cultural elements in a safe and user friendly environment enriched with interdisciplinary teaching materials for European school education.

**Target group:**

- Students
- Educators

primary and secondary education – public and private schools

Generally, the radio production is addressed to students without discriminations.

**www.europeanschoolradio.eu**

The NESTOR project is built on the existing “European School Radio” which has been operating successfully in Greece.

# NEStOR

NETWORKED EUROPEAN SCHOOL WEB RADIO

**FLEXIBLE MULTILINGUAL  
MODERN ATTRACTIVE**  
Educational Medium for Schools

## AIM

The aim of the NESTOR project is to create a Web Radio across Europe which is flexible, multilingual, modern and attractive educational medium for Schools. It will provide a safe and user friendly environment even for students with special educational needs such as visual impaired; it will be enriched with interdisciplinary teaching materials for school education at a European level; it will be integrated in modern educational requirements. The project will provide the educational community with the necessary tools for the cultivation of communication skills, participation of every European learner to a public radio program and the exchange and dissemination of cultural elements through the Web Radio.

The NESTOR project will highlight the European dimension of the existing European School Radio

<http://europeanschoolradio.eu>

which has been operating in Greece with great success.

## WHY WEB RADIO?

The Radio passed easily into the digital age by maintaining the educational and pedagogical value. The radio links reality with imagination: "At the very time the actuality occurs, thought and imagination are called to capture it." Internet Web radio allows both cooperation and two-way communication through networking offerings and "social networks". Furthermore emphasizes the spoken word, and students arrive much easier than other media to become "content providers" for the Internet media and of course the social networks.

**The direct target groups** are the following:

- Students (primary and secondary education from public and private schools)
- Educators (teachers of primary and secondary schools)

Generally, the radio production is addressed to all students without discriminations.

## OBJECTIVES

**Through the web radio** students and teachers see the school as a participatory space for self-expression and creativity and can also lead towards:

- Establishing a positive, creative and challenging climate for students in the school environment for motivating activities integrated in the school intra and extra curriculum context; educators will be enabled to work as their guides towards the creation of cultural products.
- Exposure to Media Literacy, since students get the role of Information Providers and consumers with highly critical minds.
- Promotes oral, writing and research skills for audio/radio production, use of foreign languages, communication, negotiating and debating skills as well as culture, music and arts and the involvement of students in technical processes as well.
- Familiarizing students and teachers with ICT and audio-visual productions in a protected environment, providing tools for learning through entertainment.
- Networking, within and among schools providing a model for collaborative learning and teamwork
- Increasing tolerance to different cultures and countries through the collaboration of students from different cultural backgrounds.

SCHOOL  
RADIO**

# The project aims to...

The aim of the NESTOR project is to create a Web Radio across Europe which is ***flexible, multilingual, modern and attractive educational medium*** for ***Schools***.

- It provides a **safe and user friendly environment** even for students with special educational needs such as visual impaired;
- it will be enriched with **interdisciplinary teaching materials** for school education at a European level;
- it will be integrated in modern educational requirements. The project will provide the educational community with the **necessary tools for the cultivation of communication skills**, participation of every European learner to a public radio program and **the exchange and dissemination of cultural elements** through the Web Radio.

The NESTOR project will highlight the European dimension of the existing European School Radio, which has been operating in Greece with great success.

## Target Group: Students and Educators

Erasmus+

Hellenic Ministry of  
Education, Research & Religious Affairs

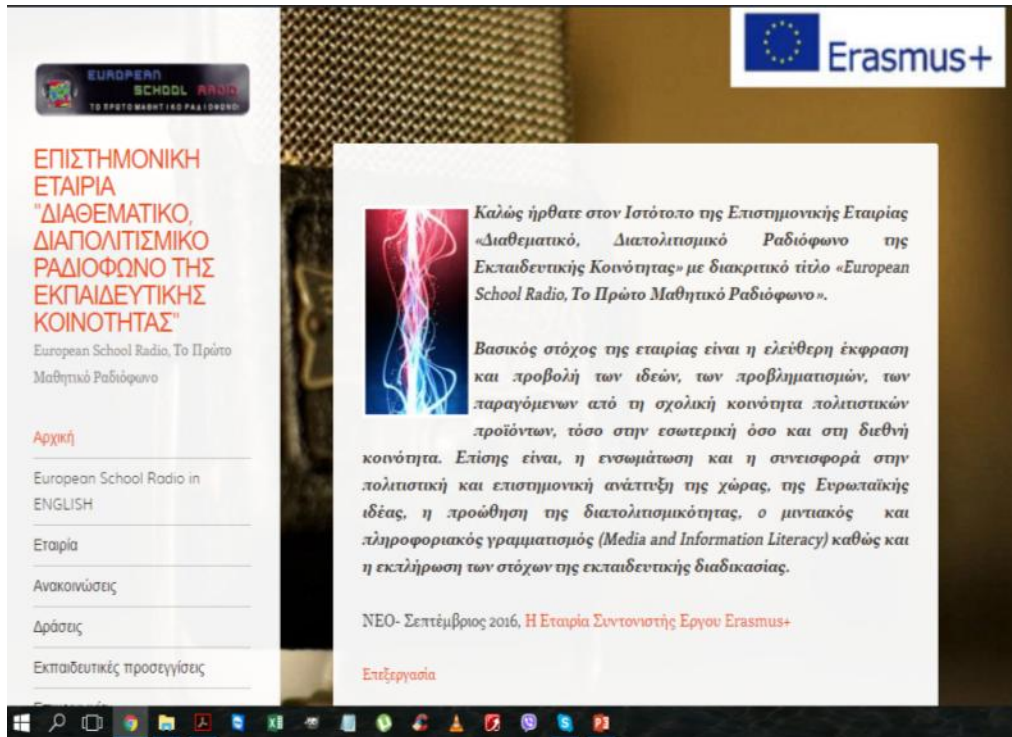

Target group: Teachers of secondary education (age group 12-18)

Hashtags: #eTwwforCulture, #eTwinning

Under the Scientific Society:

“European School Radio” (<http://esradiosociety.eu>)

Board of Directors (5) and more than 40 members all over Greece (Scientists, educators etc), *Base*: Thessaloniki, Greece

# Expected Results...

The expected results are defined in 3 axes:

- the WEB RADIO PORTAL (platform)
- the WEB RADIO
- all STUDIES AND GUIDES

for Scientific Documentation and Practical Help

All guides and analysis will be on digital format

**Special Care on the Platform for visually impaired people**

# eTwinning kit

- ☐ Cooperation with eTwinning, and other EU projects
